

For Immediate Release

The Darvill Racing team are delighted to announce that they will be competing in the FIM eRoadRacing World Cup as a Factory supported team for Brammo.

The Isle of Man based team, will run two Factory-supported privateer Brammo machines, one Prototype 2 (P2) and one eSuperStock (eSS) prepared bikes in the elite eRoadRacing class, with additional entries in National championships. Both bikes will be based on Brammo's successful Empulse R street sports bike.

"We've been considering a switch to ebikes for a while now and feel that the time is right for us to take on this new challenge," said Team Principal Alex Aitchison.

"The championship rules allow privately run teams like ours to compete on a level playing field and we are confident that we have the experience and resources to step up and contribute to what is one of the world's most exciting race series.

"As a team, we have learned a great deal racing in a plethora of disciplines and have proved ourselves through a series of race wins, pole positions, fastest laps and world titles over our fifty year history. We've worked hard over the last few years to put out a professional team and we are delighted that this has been recognised by Brammo, who have welcomed our move into the eRR class. Racing in FIM eRR will not only provide us with a fresh sporting challenge but will give considerably more exposure for our team sponsors."

Preparation of the team's first TTXP2 racer is currently underway, ahead of an extensive winter testing programme before the team makes its FIM eRoadRacing debut at Circuit Zolder in Belgium in May. The team is currently in discussion with several guest 'star' riders and is expected to announce its line-up and main sponsor shortly.
